

Plastic Barriers

Our plastic barriers provide a durable and flexible solution for traffic management, pedestrian safety and restricted access across construction sites, roadworks, events and public spaces. Available in Chapter 8, heavy duty, water-filled and angled options, they are designed for high visibility, secure connection, easy handling and reliable stability.

RETHYNC

Key Features:

- High visibility designs for improved safety and site awareness
- Chapter 8 compliant options available for traffic management projects
- Manufactured from durable UV stabilised polyethylene
- Water or sand fillable for increased stability and wind resistance
- Interlocking systems for secure, continuous barrier runs
- Lightweight, stackable and easy to transport
- Suitable for construction sites, roadworks, events and public spaces
- Reusable and designed for long-term use across multiple projects
