

Multisite Hoarding

Our Multisite Hoarding systems are designed for contractors managing multiple projects or long-term developments. Built for strength, security, and easy relocation, these hoarding panels provide a cost-effective and professional solution for securing construction sites across various locations.

Our reusable system can be supplied nationwide and is ideal for housebuilders, main contractors, civil engineers and demolition teams.

RETHYNC

Key Features:

- Installed directly into the ground for stability
- 2.4m height as standard or 3.0m with barb wire toppings
- RAL powder coated colours available
- Flexible layout to accommodate curves and gradients

Timber Fencing

At Rethync, we offer a range of timber fencing options to suit various site requirements, from site demarcation to privacy and security.

Our high-quality timber fencing balances durability, aesthetics, and functionality that provides a robust perimeter definition where metal fencing may not be suitable or where a softer, more environmentally considerate finish is required.

Our timber systems deliver strength, visibility and compliance across a wide range of site environments.

RETHYNC

Post & Rail

- Post size: 75 × 75mm
- Post height: 1.8m standard, with approximately 600mm below ground
- Rail size: 88 × 38mm or half round rails
- Rail length: 3.6m standard
